

Our Program

Who Are We

The Startup tunnel is an early stage incubator that aims to play catalyst to bring powerful ideas to life and take shape. We focus on providing mentorship to passionate teams working on game changing ideas to enhance their capabilities in product development, marketing strategy, rapid prototyping, and design & user experience. This is an attempt to ensure that great ideas are not quashed in the early stages for lack of the right kind of guidance. We work with start-ups in various development sectors such as, mobile technology, alternative energy, governance, financial services, education and health. Our sister organization, CKS Consulting has established expertise in these sectors (and more) and so we have in-house mentors and advisors, as well as a professional network that can help start-ups gain traction.

Why Us ?

Exceptional & Cost
Effective Solutions

FREE technical support
for 1 Year

Industry experience of
more than 10 years

Oriented Innovation with
futuristic thinking

Specialization in custom
design & development

Our Program

We provide a three month incubation program to early stage start-ups where they are exposed to the fundamentals of product development and an insight into the start-up life of entrepreneurs. The program is split into two modules, namely, Digital Product Development and Startup Operations and Management.

“Entrepreneurship is living your life like most people won’t, so that you can spend the rest of your life like most people can’t.” In association with the Adeana School for Leadership and Innovation, the Startup Tunnel provides a course that prepares entrepreneurship enthusiasts for the challenges, opportunities and perks of the startup life. Learn the ABC of entrepreneurship from modeling a business to the finer points of running an enterprise. The course gives budding and serial entrepreneurs, insights into the startup space. From incorporation to IPO, it is a one-stop shop course on the essentials of entrepreneurship.
